

Ovigo

Full Application Walkthrough

Every workflow, every role, screen by screen

September 5, 2026

Ovigo is a Bangladesh-focused travel marketplace connecting travelers with Local Experts (fixed-date tours and custom itineraries), Hosts (stays), and Rent-a-Car partners – with a full admin console, loyalty and promotions, in-app messaging with translation, smart recommendations, and Elasticsearch-backed search. This document walks through every major workflow live on the production application, screen by screen, for each of the roles that use it: traveler, Local Expert, Host, Rent-a-Car partner, Guide, and admin.

Chapter 1

Introduction

Ovigo is a modular-monolith marketplace: one FastAPI backend and one Next.js frontend serve every role. A single user account can hold a traveler identity and one or more *partner roles* (Local Expert, Host, Rent-a-Car, Hotel, Guide) side by side – the same login that books a trip can also run a tour business.

This walkthrough is organized in three parts, mirroring how the app itself is structured:

- **Part I – Traveler Experience:** browsing, booking, paying, messaging, loyalty, and custom trip requests – everything a traveler touches.
- **Part II – Partner Dashboards:** how a Local Expert, Host, Rent-a-Car partner, and Guide manage their own listings, bookings, and earnings.
- **Part III – Admin Console:** the moderation and operations surface Ovigo staff use to approve listings, verify payments, resolve disputes, and run the marketplace.

Every screenshot in this document was captured live from the production application (<https://ovigo.vercel.app>), using a realistic demo dataset seeded for this purpose – a published tour, stay, and vehicle; a completed booking with reviews and earned loyalty points; a pending payment with a promo code applied; an open custom trip request with a submitted bid; and one pending item of each type (tour, stay, vehicle, ad campaign, trust badge, business referral) so the admin approval workflow could be shown in action, not just described.

1.1 Demo Accounts

Every account below is real and live in production, seeded specifically for this walkthrough (every listing/request title is prefixed **Demo:** and every email uses the `ovigo-demo.com` domain, so it's easy to tell apart from genuine user data). All seven share the same password.

Role	Email	Password
Super Admin	demo-superadmin@ovigo-demo.com	DemoPass123!
Admin	demo-admin@ovigo-demo.com	DemoPass123!
Traveler	demo-traveler@ovigo-demo.com	DemoPass123!
Traveler (2nd)	demo-traveler2@ovigo-demo.com	DemoPass123!
Local Expert	demo-expert@ovigo-demo.com	DemoPass123!
Host	demo-host@ovigo-demo.com	DemoPass123!
Rent-a-Car	demo-rentcar@ovigo-demo.com	DemoPass123!
Guide	demo-guide@ovigo-demo.com	DemoPass123!

Admin vs. Super Admin: in the current build these two are functionally identical – every admin-only screen in Part III accepts either role, and no action anywhere is gated to Super Admin exclusively yet. Super Admin exists in the codebase as a reserved, higher-privilege role for future use, not as a distinct set of screens today.

Chapter 2

Roles & Permissions

A single Ovigo account can hold a traveler identity plus one or more approved *partner roles* at the same time – the same login can browse and book as a traveler, run a tour business as a Local Expert, and rent out a car as a Rent-a-Car partner, all at once. Every role below is additive to Traveler: a partner role adds capability, it never removes the ability to also browse and book like any other traveler.

Role	Can do
Traveler	Browse tours, stays, and vehicles; search by destination and free-text keyword; combine items from multiple services into one cart for an automatic bundle discount; check out via SSLCommerz or bank transfer; redeem loyalty points and promo codes at checkout; cancel a booking; leave a review on a completed item; message a partner in-app (with on-demand Bengali/English translation); raise a dispute on a booking; post a custom trip request and accept a submitted bid; view loyalty balance and history; apply for a partner role.
Local Expert	Everything a Traveler can do, <i>plus</i> : create and manage fixed-date tours (itinerary, departures, meals, activities, add-ons, transport, images); submit tours for admin approval; invite and supervise Guides and assign them to specific departures; bid on open custom trip requests; refer local businesses into the partner network; run sponsored ad campaigns on own published listings; apply for trust badges; view commission earnings and listing analytics; maintain a public profile.

Role	Can do
Host / Hotel	Everything a Traveler can do, <i>plus</i> : create and manage properties (room types, amenities, policies, rate plans, per-date availability); submit properties for admin approval; invite and manage property staff (Manager / Front-Desk / Housekeeping); run front-desk operations (walk-in bookings paid in person, check-in/check-out, room assignment, housekeeping status); sync availability via iCal import/export; run ad campaigns; apply for trust badges; view earnings and analytics.
Rent-a-Car	Everything a Traveler can do, <i>plus</i> : create and manage vehicles and a driver roster; set vehicle availability; submit vehicles for admin approval; run ad campaigns; apply for trust badges; view earnings and analytics.
Guide	A supervised role under a specific Local Expert, not an independent listing owner: accept or decline a supervision invitation; view and fulfil tour-departure assignments (check in/out with the group); set personal availability; view earnings from completed assignments only.
Admin	Approve or reject every partner role application, tour, property, vehicle, ad campaign, and trust badge before it can go live; verify or reject uploaded partner documents; manage the location hierarchy; view every booking and payment on the platform; manually verify or reject bank-transfer payments; resolve disputes (refund or reject); approve, reject, or link business referrals to a real partner account; moderate chat (review reported messages, close threads); configure commission-rate rules; process partner payout batches; review fraud/ risk flags and trigger a duplicate-document scan; compose platform-wide notification campaigns; create and deactivate promo codes; view marketplace-wide analytics reports.
Super Admin	Identical to Admin in the current build – see the note above. Reserved for higher-privilege operations not yet built.

Part I

Traveler Experience

Chapter 3

Getting Started

3.1 Homepage

The homepage highlights the three core browsing categories – Tours, Stays, and Rent-a-Car – alongside search entry points.

Figure 3.1: The Ovigo homepage.

3.2 Registration

A new account needs a full name, an email *or* phone number, and a password of at least 8 characters.

The screenshot shows the Ovigo website's registration page. The header includes the Ovigo logo, navigation links for 'Tours', 'Stays', and 'Rent a Car', a currency selector set to 'BDT', a 'Sign in' link, and a 'Create account' button. The main content area features a white card with the title 'Create your account' and the subtitle 'Join Ovigo as a traveler.' The form contains the following fields: 'Full name' (filled with 'Anika Rahman'), 'Email' (filled with 'anika.example@example.com'), 'Phone' (filled with 'DemoPass123!'), and 'Password' (empty). A note states 'Optional if email is provided' below the phone field. At the bottom of the card is a blue 'Create account' button and a link that says 'Already have an account? Sign in'.

Figure 3.2: Creating a new account.

3.3 Login

Login accepts either an email or a phone number as the identifier. A successful login returns a short-lived access token and a longer-lived refresh token, stored as a persisted browser session.

The image shows the Ovigo login page. At the top, there is a navigation bar with the Ovigo logo on the left and links for 'Tours', 'Stays', and 'Rent a Car' in the center. On the right side of the navigation bar, there are links for 'BDT', 'Sign in', and a 'Create account' button. Below the navigation bar, the main content area features a large, light blue gradient background. In the center of this area is a white login card. The card has the Ovigo logo at the top left, followed by the heading 'Welcome back' and the subtext 'Sign in to continue to Ovigo.' Below this, there are two input fields: 'Email or phone' with the value 'demo-traveler@ovigo-demo.com' and 'Password' with masked characters. A blue 'Sign In' button is positioned below the password field. At the bottom of the card, there is a link that says 'Don't have an account? Create one'.

Chapter 4

Browsing & Discovery

4.1 Tours

Published fixed-date tours can be filtered by destination and, since Sprint 27-28, searched by free-text keyword – backed by Elasticsearch with an automatic plain-text fallback if the search cluster is ever unreachable.

Figure 4.1: Browsing published tours.

Figure 4.2: Free-text keyword search for “Sundarbans”.

A tour’s detail page shows its full itinerary, included meals and activities, optional paid add-ons, trust badges, and a booking widget for choosing a departure date and number of travelers.

Figure 4.3: A tour’s detail page.

Smart Recommendations Engine

Below the fold, every tour/stay/vehicle detail page surfaces two independent recommendation strategies: **Similar listings** (content-based – same location, similar price, same category) and **Frequently booked together** (collaborative – genuine co-occurrence counts from real completed bookings, not a simulation).

Figure 4.4: Reviews and recommendations on a tour's detail page.

4.2 Stays

Properties (hotels, resorts, homestays, guesthouses) list room types, amenities, and policies.

The screenshot shows the top navigation bar of the Ovigo website. It includes the Ovigo logo, links for Tours, Stays (highlighted), Rent a Car, and Dashboard. On the right, there are links for BDT, a shopping cart, a document icon, a bell icon, and a user profile for Anika Rahman. Below the navigation bar is the 'Explore Stays' section, which prompts users to search for hotels, resorts, homestays, and guesthouses. The search form includes fields for Destination slug, Keyword (e.g., pool, homestay), Check-in date (mm/dd/yyyy), Check-out date (mm/dd/yyyy), and the number of Guests (1). A blue 'Search' button is positioned to the right of the form.

Figure 4.5: Browsing published stays.

The screenshot displays the property detail page for 'Cox's Bazar Ocean Breeze Resort'. The page features a 'Resort' tag and a 'Message this Host' button. A description states it is a beachfront resort on Cox's Bazar's Laboni Point. Under the 'Amenities' section, there are tags for WiFi, Pool, Breakfast Included, AC, and Airport Pickup. The 'Room types' section lists two options: 'Deluxe Sea View' (Up to 2 guests, ₳6500.00/night, King bed, private balcony facing the sea) and 'Standard Twin' (Up to 2 guests, ₳4000.00/night, Two single beds, garden view). The 'Book this stay' section includes a dropdown for Room type (currently set to 'Deluxe Sea View — ₳6500.00/night'), fields for Check-in and Check-out dates (mm/dd/yyyy), a Rooms field (set to 1), and a field for Guest 1 full name. A '+ add another guest' link is also present.

Figure 4.6: A property's detail page.

4.3 Rent-a-Car

Vehicles list make, model, transmission, seating, and whether a driver is included.

Figure 4.7: Browsing published vehicles.

Figure 4.8: A vehicle's detail page.

4.4 Multi-Currency Display

A traveler can switch the header’s currency hint to see an approximate foreign-currency price alongside the real BDT amount, using live exchange rates. Every booking is still charged and settled in BDT – this is a display-only convenience, not a second checkout currency.

Figure 4.9: The currency switcher, showing a live conversion hint.

Chapter 5

Checkout & Bookings

5.1 The Multi-Service Cart

A traveler can combine a tour, a stay, and a vehicle rental into a single checkout. Combining two distinct service types earns an automatic 5% discount; combining all three earns 10% – applied only to the total charged, never to what a partner is paid, so no partner’s payout shrinks because of a platform promotion.

The screenshot shows the Ovigo website's checkout cart. The header includes the Ovigo logo, navigation links for Tours, Stays, Rent a Car, and Dashboard, and a user profile for Anika Rahman. The main content area is titled 'Cart' and explains that users can combine tours, stays, and vehicle rentals for a single payment and booking record. A tip suggests adding different service types for a discount. The cart contains one item: 'Demo: Sundarbans Wildlife Expedition' with a price of ₹4500.00. Below the item, there are input fields for 'Guest / traveler names' (with a placeholder 'Guest 1 full name' and a link to '+ add another guest'), a 'Promo code' field (with a placeholder 'e.g. WELCOME10'), and a 'Redeem points' field (showing 'you have 267' points and a value of '0'). The total is displayed as ₹4500.00, and a blue 'Checkout & Pay' button is at the bottom.

Figure 5.1: The cart, ready for a multi-service checkout.

5.2 Booking History

Every booking a traveler has made, across every service type, in one list.

Figure 5.2: A traveler’s booking history.

5.3 Booking Detail

A completed booking’s detail page itemizes every discount applied – bundle, promo code, and loyalty points – separately from the base price, and opens a review form for each completed item.

Figure 5.3: A completed, multi-item booking with its discount breakdown.

A pending-payment booking offers both an online gateway (SSLCommerz) and a manual bank-transfer option.

Figure 5.4: A pending booking with a promo code applied, awaiting payment.

5.4 Loyalty Wallet

Every completed booking earns reward points (1 point per BDT 100 spent), which can be redeemed 1:1 for a discount on a future booking. Unlike a promo code, points are refunded if a booking that redeemed them is later cancelled – they’re the traveler’s own earned balance, not a scarce promotional resource.

Figure 5.5: The loyalty wallet – balance and transaction history.

Chapter 6

Custom Trips

A traveler who can't find a fixed-date tour that fits can post a custom trip request – destination, dates, group size, and budget – and Local Experts submit priced, day-by-day itinerary bids against it. Accepting a bid converts it directly into a real booking, reusing the entire existing payment/commission/escrow pipeline.

Figure 6.1: A traveler's custom trip requests.

Figure 6.2: A custom request with a submitted bid awaiting a decision.

Chapter 7

Messaging

In-app chat connects a traveler directly to the partner behind a tour, property, or vehicle – context-aware (tied to the specific listing) and, once a booking is confirmed, no longer redacting contact details.

Figure 7.1: A traveler's message threads.

7.1 Translation-Assisted Chat

Either side of a conversation can translate a message between English and Bengali on demand, via a free translation API – the original message always stays the source of truth.

Figure 7.2: A chat thread, including a message in Bengali.

Figure 7.3: The same message translated to English on demand.

Part II

Partner Dashboards

Chapter 8

Becoming a Partner

Any traveler account can apply for one or more partner roles. Each role goes through admin review before it can publish anything live.

The screenshot shows the Ovigo website's 'Become a Partner' page. The header includes the Ovigo logo, navigation links for Tours, Stays, Rent a Car, and Dashboard, and a user profile for Rafiq Islam. The main content area is titled 'Become a Partner' and includes a sub-header 'Apply for a new role'. Below this is a dropdown menu with 'Local Expert' selected. A text area for 'Tell us a bit about yourself (optional)' is present, followed by a 'Submit application' button. At the bottom, a section titled 'Your roles' shows 'No applications yet.'

Chapter 9

Local Expert Dashboard

A Local Expert runs fixed-date tours and responds to custom trip requests.

9.1 Managing Tours

The screenshot displays the Ovigo Local Expert Dashboard. At the top, the Ovigo logo is on the left, and navigation links for Tours, Stays, Rent a Car, and Dashboard are in the center. On the right, there's a currency selector (BDT), a shopping cart icon, a notifications bell with two red alerts, and a user profile for Tanvir Ahmed. The main section is titled "Your Tours" with a note: "Requires an approved Local Expert role. Apply at [Become a Partner](#) if you haven't yet." Below this is a form to "Create draft tour" with fields for Title, Duration (days) set to 1, and Base price (₹) set to 150.00. A list of tours follows: "Demo: Sundarbans Mangrove Sunrise Tour (awaiting approval)" with 1 day and ₹2200.00, marked "Pending Review"; and "Demo: Sundarbans Wildlife Expedition" with 2 days and ₹4500.00, marked "Published".

Title	Duration (days)	Base price (₹)	Status
	1	150.00	<button>Create draft tour</button>
Demo: Sundarbans Mangrove Sunrise Tour (awaiting approval)	1 days - ₹2200.00		Pending Review
Demo: Sundarbans Wildlife Expedition	2 days - ₹4500.00		Published

A Local Expert can refer local businesses (restaurants, shops) they recommend into Ovigo’s partner network.

Figure 9.5: Referring a local business.

9.5 Earnings & Analytics

Figure 9.6: Commission earnings from completed bookings.

Figure 9.7: Listing performance analytics.

9.6 Advertising

A partner can run sponsored-placement ad campaigns (CPC or CPM) on their own published listings.

The screenshot shows the Ovigo application interface. The top navigation bar includes the Ovigo logo, links for Tours, Stays, Rent a Car, and Dashboard, along with user information for Tanvir Ahmed. The main section is titled "Ad Campaigns" and includes a brief description: "Promote one of your published listings in search results, targeted by destination. Every campaign is reviewed by our team before it goes live."

The "New campaign" form contains the following fields:

- What are you advertising?**: A dropdown menu with "A Tour" selected.
- Which listing**: A dropdown menu with "Select a published listing.." selected.
- Placement**: A dropdown menu with "Sponsored" selected.
- Billing model**: A dropdown menu with "Cost per click" selected.
- Bid per click (₹)**: An input field.
- Total budget (₹)**: An input field.

A blue button labeled "Create draft campaign" is located below the form fields.

Below the form, there is a list of existing campaigns. The first entry is:

- Demo: Sundarbans Wildlife Expedition**: Featured · CPC · ₹0.00 / ₹500.00 spent. Status: Pending Review.

Figure 9.8: Ad campaigns.

The screenshot shows the Ovigo dashboard interface. At the top, there's a navigation bar with the Ovigo logo, links for Tours, Stays, Rent a Car, and Dashboard. On the right, there's a user profile for Tanvir Ahmed with notification icons. The main content area is titled 'Demo: Sundarbans Wildlife Expedition' with a 'Pending Review' status. Below this, there are three sections: 'Performance' showing 0 Impressions, 0 Clicks, 0.00% CTR, and \$0.00 Spent; 'Bid & Budget' with a bid of 5.00 and a total budget of 500.00; and 'Destinations' with a search bar and a 'Save destinations' button.

9.7 Public Profile

The screenshot shows the 'Public Profiles' section of the Ovigo dashboard. It includes a header with the Ovigo logo and navigation links. The main content area is titled 'Public Profiles' with a sub-header 'These are shown to travelers browsing experts and hosts. Requires an approved partner role of the matching type.' Below this, there are two sections: 'Local Expert Profile' and 'Host Profile'. The 'Local Expert Profile' section has a 'Choose File No file chosen' button, a 'Headline (e.g. Cox's Bazar specialist)' input field, a 'Bio' text area, a 'Years of experience' input field, and a 'Published (visible in search)' checkbox. The 'Host Profile' section has a 'You need an approved Host or Hotel role to set this up.' message.

Chapter 10

Host Dashboard

A Host manages one or more properties, each with its own room types, availability, and staff.

10.1 Managing Properties

The screenshot shows the 'Your Properties' section of the Ovigo Host Dashboard. At the top, there's a navigation bar with the Ovigo logo, links for Tours, Stays, Rent a Car, and Dashboard, along with a currency selector (BDT), a shopping cart icon, a chat icon, a notification bell with a red badge, and a user profile for Nusrat Jahan. Below the navigation bar, the 'Your Properties' section is titled, followed by a note: 'Requires an approved Host or Hotel role. Apply at [Become a Partner](#) if you haven't yet.' The main content area contains a form to create a new property with fields for 'Name' and 'Type' (set to 'Homestay'), and a 'Create draft property' button. Below this, there are two property cards. The first card is for 'Demo: Sylhet Tea Garden Homestay (awaiting approval)' with a 'Homestay' type and a 'Pending Review' status. The second card is for 'Demo: Cox's Bazar Ocean Breeze Resort' with a 'Resort' type and a 'Published' status.

Figure 10.1: A Host's properties – one published, one awaiting review.

The screenshot displays the Ovigo Host Dashboard for editing a property named "Demo: Cox's Bazar Ocean Breeze Resort". The dashboard includes a top navigation bar with the Ovigo logo, menu items (Tours, Stays, Rent a Car, Dashboard), and user information (BDT, cart, notifications, and user profile). The main content area is divided into four sections:

- Photos:** A section with a "Choose File" button and the text "No file chosen".
- Trust Badges:** A section with three badges: "Verified", "Safety Certified", and "Couple Friendly", each with an "Apply" button.
- Destinations:** A section with a search input field (placeholder: "Search destinations (e.g. Dhaka, Cox's Bazar)...") and a "Save destinations" button.
- Amenities:** A section with a row of amenity tags: "WiFi", "Pool", "Parking", "AC", "Breakfast Included", "Pet Friendly", "Airport Pickup", "TV", and "Hot Water". Below this row is a "Kitchen" tag and a "Save amenities" button.

14.2 Bookings

The screenshot shows the Ovigo Admin interface. The sidebar on the left contains the following links: Admin, Partner Approvals, Tour Approvals, Property Approvals, Vehicle Approvals, Locations, Bookings (highlighted), Payments, Disputes, Business Referrals, Chat Moderation, Commission Rules, Payouts, Trust Badges, Ad Campaigns, Promo Codes, Fraud & Risk, Notifications, and Reports. The main content area is titled 'Bookings' and features a filter bar with buttons for All, Pending Payment, Confirmed, Checked In, Checked Out, Completed, and Cancelled. Below the filter bar is a table with the following columns: TRAVELER, STATUS, ITEMS, TOTAL, and CREATED.

TRAVELER	STATUS	ITEMS	TOTAL	CREATED
Rafiq Islam demo-traveler2@ovigo-demo.com	Pending Payment	1	4500.00 BDT	9/5/2026, 2:29:37 AM
Rafiq Islam demo-traveler2@ovigo-demo.com	Cancelled	1	4000.00 BDT	9/5/2026, 2:29:31 AM
Tanvir Ahmed demo-expert@ovigo-demo.com	Pending Payment	1	4500.00 BDT	9/5/2026, 2:29:29 AM
Anika Rahman demo-traveler@ovigo-demo.com	Pending Payment	1	3825.00 BDT	9/5/2026, 2:29:27 AM
Anika Rahman demo-traveler@ovigo-demo.com	Completed	3	26730.00 BDT	9/5/2026, 2:22:48 AM
ABIR MAHMUD abir.skoder@gmail.com	Confirmed	1	2500.00 BDT	9/4/2026, 9:44:21 PM
salman ahmed salmanahmed382.jubair@gmail.com	Pending Payment	1	2500.00 BDT	8/30/2026, 10:26:05 PM

Figure 14.2: Every booking on the platform.

14.3 Payments

Bank-transfer payments need manual verification against the traveler-supplied reference number before the booking confirms.

The screenshot shows the Ovigo Admin dashboard with the 'Payments' section selected in the left sidebar. The main content area is titled 'Payments' and contains a 'Pending Bank Transfers' section. This section displays a single transaction with the following details:

- Transaction ID: OVIGO-BT-5F8927A906F157179B
- Amount: ₺4500.00
- Reference: TXN-DEMO-2026-002

There are two buttons: 'Verify' (highlighted in blue) and 'Reject'.

Below this is the 'All Payments' section, which includes a filter bar with buttons for 'All', 'Initiated', 'Validated', 'Failed', and 'Cancelled'. The 'All' button is selected. Below the filter bar is a table with the following data:

TRANSACTION	PROVIDER	STATUS	AMOUNT	CREATED
OVIGO-BT-5F8927A906F157179B	Bank_transfer	Initiated	4500.00 BDT	9/5/2026, 2:29:38 AM
OVIGO-BT-CD9860D5155FBC8AC4	Bank_transfer	Validated	26730.00 BDT	9/5/2026, 2:22:51 AM
OVIG0169189905A1C896210	Sslcommerz	Validated	2500.00 BDT	9/4/2026, 9:44:24 PM
OVIG0813071B086D52C9E6C	Sslcommerz	Initiated	2500.00 BDT	8/30/2026, 10:26:12 PM
OVIG00EB3E9CD48A87AEBF8	Sslcommerz	Validated	2500.00 BDT	8/30/2026, 10:24:07 PM
OVIG048EB830DE2DF10123C	Sslcommerz	Initiated	2500.00 BDT	8/30/2026, 10:11:10 PM

Figure 14.3: A bank-transfer payment awaiting verification.

This screenshot is identical to Figure 14.3, showing the same 'Pending Bank Transfers' section and 'All Payments' table. The 'Verify' button is still present, indicating the payment is still in a pending state.

Figure 14.4: After verification – the same confirm/escrow/commission/notification pipeline as a card payment runs.

14.4 Disputes

Figure 14.5: An open dispute on a cancelled booking.

14.5 Business Network

Figure 14.6: A business referral awaiting approval.

14.6 Chat Moderation

Figure 14.7: Reported chat messages across every thread.

Chapter 15

Finance & Trust

15.1 Commission Rules

The screenshot shows the Ovigo Admin dashboard. The left sidebar contains a list of admin functions: Admin, Partner Approvals, Tour Approvals, Property Approvals, Vehicle Approvals, Locations, Bookings, Payments, Disputes, Business Referrals, Chat Moderation, Commission Rules (highlighted), Payouts, Trust Badges, Ad Campaigns, Promo Codes, Fraud & Risk, Notifications, and Reports. The main content area is titled 'Commission Rules' and includes a 'New rule' button. Below the title is a descriptive text: 'A PARTNER-scope rule for a specific partner overrides the CATEGORY default for that item type. There is one platform-wide NETWORK rule applied to referring experts.' A table displays the current rules with columns for SCOPE, ITEM TYPE, PARTNER, RATE, and ACTIVE. The table contains five rows: four Category rules for vehicle_rental, tour_departure, room_type, and custom_bid, all with a rate of 10.00% or 12.00%, and one Network rule with a rate of 2.00%. Each rule is marked as 'Yes' for active and has a 'Deactivate' link.

SCOPE	ITEM TYPE	PARTNER	RATE	ACTIVE
Category	vehicle_rental	-	12.00%	Yes Deactivate
Category	tour_departure	-	10.00%	Yes Deactivate
Category	room_type	-	12.00%	Yes Deactivate
Category	custom_bid	-	10.00%	Yes Deactivate
Network	—	-	2.00%	Yes Deactivate

Figure 15.1: Commission rate rules by partner role and listing type.

15.2 Payouts

The screenshot shows the Ovigo Admin interface. The top navigation bar includes links for Tours, Stays, Rent a Car, and Dashboard. The sidebar on the left lists various admin functions, with 'Payouts' highlighted. The main content area is titled 'Payouts' and contains a 'Pending Batch Preview' section with a table of commission details and a 'Run payout batch' button. Below this is a 'Payout History' section indicating no payouts have been run yet.

Pending Batch Preview	
Tanvir Ahmed - 1 commission(s)	৳8100.00
Nusrat Jahan - 1 commission(s)	৳12584.00
Kamal Hossain - 1 commission(s)	৳5632.00
Total:	৳26316.00

Figure 15.2: Partner payout batches.

15.3 Trust Badges

Figure 15.3: A trust badge application awaiting approval.

15.4 Advertising

Figure 15.4: An ad campaign awaiting approval.

15.5 Fraud & Risk

Rule-based fraud detection runs inline wherever the triggering event happens – here, a Local Expert booking their own tour is flagged automatically as a self-booking signal.

The screenshot displays the Ovigo Admin dashboard. The top header features the Ovigo logo, navigation links for Tours, Stays, Rent a Car, and Dashboard, along with user and system status indicators. The left sidebar lists various admin functions, with 'Fraud & Risk' highlighted. The main content area is titled 'Fraud & Risk' and includes a descriptive paragraph about automatic flags and a 'Scan documents' button. Below this, there are filter buttons for 'Open', 'Resolved', 'Dismissed', and 'All'. A specific risk flag for 'Tanvir Ahmed' is shown, categorized as 'Medium' risk, with details about a self-booking and a 'Review' button.

Fraud & Risk

Self-booking, self-review, self-referral and rapid-cancellation flags fire automatically. Duplicate identity documents need a manual scan (cross-account comparison).

Chapter 16

Communication & Reporting

16.1 Notifications

The screenshot displays the Ovigo admin dashboard. The top navigation bar includes the Ovigo logo, links for Tours, Stays, Rent a Car, and Dashboard, along with user information (BDT, Admin Demo) and a notification bell icon. The left sidebar lists various admin functions, with 'Notifications' highlighted in blue. The main content area is titled 'Notifications' and includes a sub-header: 'Reusable templates and admin-broadcast campaigns — delivered in-app only (no email/SMS/push provider configured yet)'. Below this, there are three tabs: 'Send Campaign' (active), 'Templates', and 'History'. The 'Send Campaign' tab contains a form for creating a new campaign. The form includes a 'Use a template (optional)' dropdown menu with 'Ad-hoc message' selected, a 'Title' input field, a 'Message' text area, an 'Audience' dropdown menu set to 'Everyone', a 'Mark urgent' checkbox, and a 'Send campaign' button.

Figure 16.1: Composing a platform-wide notification campaign.

16.2 Reports

The screenshot shows the Ovigo application interface. The top navigation bar includes the Ovigo logo, a menu with 'Tours', 'Stays', 'Rent a Car', and 'Dashboard', and user information 'BDT' and 'Admin Demo'. The left sidebar lists various admin functions, with 'Reports' highlighted at the bottom. The main content area is titled 'Reports' and contains a description: 'A curated set of reports built from existing platform data — not a 20-report suite, since a smaller set of genuinely useful, correctly-computed reports beats a large set of superficial ones.' Below this are several report filters: 'Bookings Summary' (selected), 'Platform Revenue', 'Partner Performance', 'Fraud Overview', 'Dispute Overview', 'Referral Overview', and 'Partner Approval Funnel'. A table displays 7 rows of data with columns for 'PERIOD', 'STATUS', 'BOOKING COUNT', and 'GROSS REVENUE'. An 'Export CSV' link is located at the top right of the table.

PERIOD	STATUS	BOOKING COUNT	GROSS REVENUE
2026-08	pending_payment	1	₺2500.00
2026-08	confirmed	1	₺2500.00
2026-08	cancelled	1	₺2500.00
2026-09	pending_payment	2	₺8325.00
2026-09	confirmed	2	₺7000.00
2026-09	completed	1	₺26730.00
2026-09	cancelled	1	₺4000.00

Figure 16.2: Marketplace-wide analytics reports.

16.3 Promotions

The screenshot shows the Ovigo Admin interface. The top navigation bar includes links for Tours, Stays, Rent a Car, and Dashboard. The sidebar on the left lists various admin functions, with 'Promo Codes' highlighted. The main content area is titled 'Promo Codes' and contains a form to create a new promo code and a list of existing ones.

Create a promo code

Code	Discount type
WELCOME10	Percentage off
Discount %	Max total redemptions (blank = unlimited)
10

Chapter 17

Closing Notes

This walkthrough reflects the production application as of September 5, 2026. New sprints continue to add capability on top of everything shown here – see [PROGRESS_TRACKER.md](#) in the repository for the live, sprint-by-sprint build status, and [API_DOCUMENTATION.md](#) for the developer-facing API reference if you’re integrating against Ovigo programmatically rather than through this web interface.
